Apply Changes

- **Tabs Position** – Positions the menu at the top or bottom of the Syndi
- **Transition Effect** – The effect that occurs when you paginate between content items
- **Transition Speed** – Time in milliseconds for the paginate transition
- **CSS Override** – Customize the Syndi with individual custom CSS here

Menu Title	Menu Title
Page Background (300x169-519px)	 Upload Image
Menu Button BG (variable x 31px)	 Upload Image
Menu Click Link (optional)	http://
 	

Clicking **ADD MENU** will bring up this option.

- **Menu Title** – The menu's title
- **Page Background (optional)** – That specific menu's background image for the content area
- **Menu Button BG (optional)** – Image for menu tab. Use an image sprite to enable hover states
- **Menu Click Link (optional)** – Set the menu tab to click out to an external link

Click on the **CONTENT** button within the Syndi to add content for that group.

Add Article

 (85x125px) 	Title	Article Title
	URL	http://www.example.com/
	Content	Content goes here...

ADD ARTICLE

This page lets you add an article.

- **Title** – Article's title
- **URL (optional)** – Article's "Read More" link
- **Content** – Article text
- **Image** – Upload an article image here. Can be any dimension that fits within the available area

ADD IMAGE

Upload images here.

- **Title** – Image title (not shown in the unit)
- **Image** – Upload image
- **Click URL (optional)** – Click-through link for the image

Add Video

Title	Video Title
Autostart	<input type="text" value="true"/>
Mute	<input type="text" value="true"/>
Random Playlist	<input type="text" value="true"/>
Springboard Video Embed	<div>Springboard Video embed code goes here...</div>

ADD VIDEO (Springboard Video Only)

Add a Springboard Video and/or Playlist.

- **Title** – Video's title (not shown in the unit)
- **Autostart** – Determines if the player should auto-play the video on load
- **Mute** – Determines if the player should be muted on load
- **Random Playlist** – Randomize a Springboard Video playlist embed code.
- **Springboard Video Embed** – Supports either a regular Springboard Video embed or a Playlist embed
 - **NOTE:** Springboard Video Playlist is limited to 10 videos with the default embed. To enable up to 25 videos, append: `/0/0/25/0/0` to the **movie** and **src** attribute URLs in the playlist embed code.

Add Twitter

Title	Twitter Title
Username	
Number of tweets	10

Twitter

Add an user's Twitter stream here.

- **Title** – Twitter title (not shown in the unit)
- **Username** – Twitter username
- **Number of tweets** – How many Twitter posts should be shown on load

Add RSS

Title	RSS Title
Feed URL	
Number of Articles	5

RSS

Add an **RSS** feed.

- **Title** – RSS title (now shown in the unit)
- **Feed URL** – URL to RSS feed
- **Number of Articles** – Number of items to load from RSS feed

Custom Embed Code

Title	Title
Use Template (optional)	<input type="text" value="none"/>
Embed Code	Embed code goes here...

Custom Embed Code

Supports any embeddable units.

- **Title** – Title of Embed Code (not shown in the unit)
- **Use Template (optional)** – Use a preset **EMBED CODE** template
- **Embed Code** – Any code that is capable of running after page load (Flash widgets, iframe units, etc)
