☐	2	Test				03/06/12 1:04 PM	🟢

Create a new Hotspot by filling out a title. The listing contains all previously created Hotspots. Click on the **TITLE** to edit and the **PREVIEW** image to view the Hotspot.

🗺️ [Demo]   🔍 Preview   ✓ Exit

⬆️ 1. Upload Background   🎨 2. Set Default Style for Points   🗺️ 3. Add New Point   ⚙️ Advanced Settings

Here is the workspace. To start, **UPLOAD** a background image. The Hotspot's **maximum width** is **1000px** with **any height.**
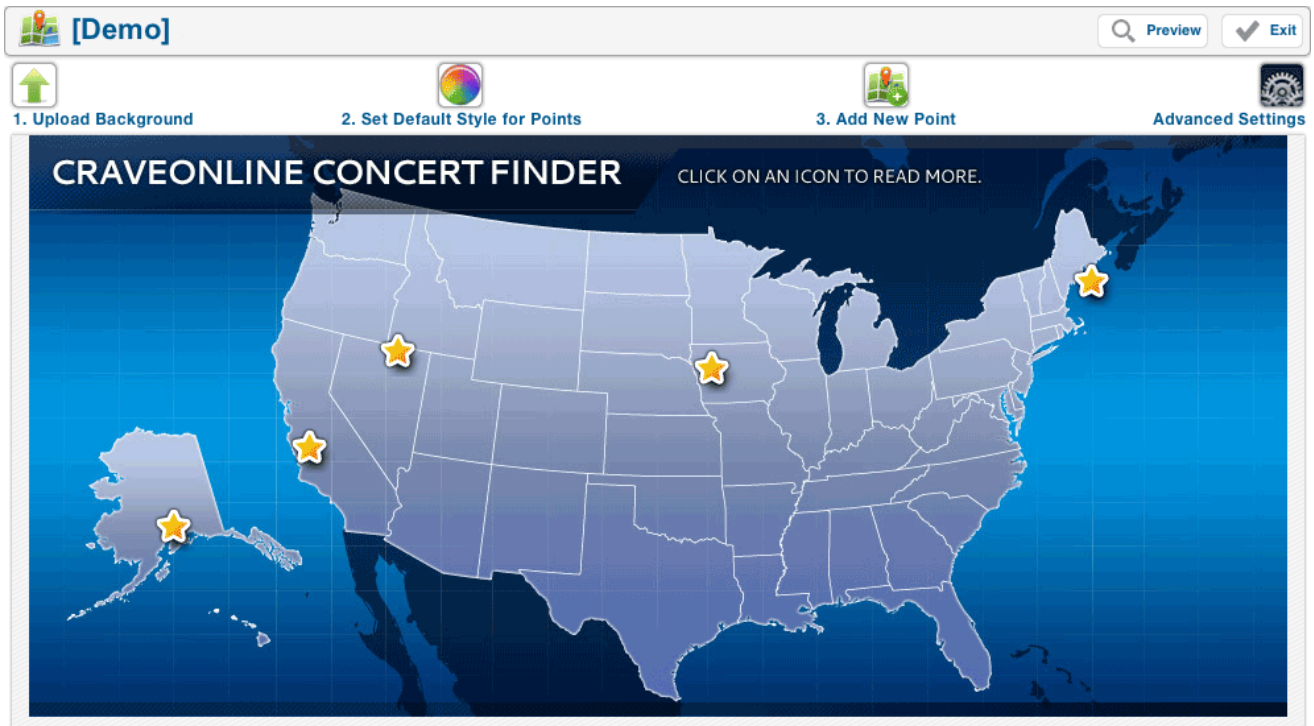

After **UPLOADING** a background, you can start adding **POINTS** and set **OPTIONS**.

1. **Upload Background** – Uploads the background image of the Hotspot
2. **Set Default Style for Points** – Customize the point's popup's color scheme
3. **Add New Point** – Add a new point to the map
4. **Advanced Settings** – Set the **Google Analytics tracking ID** and add **CUSTOM CSS**

Set Default Style for Points
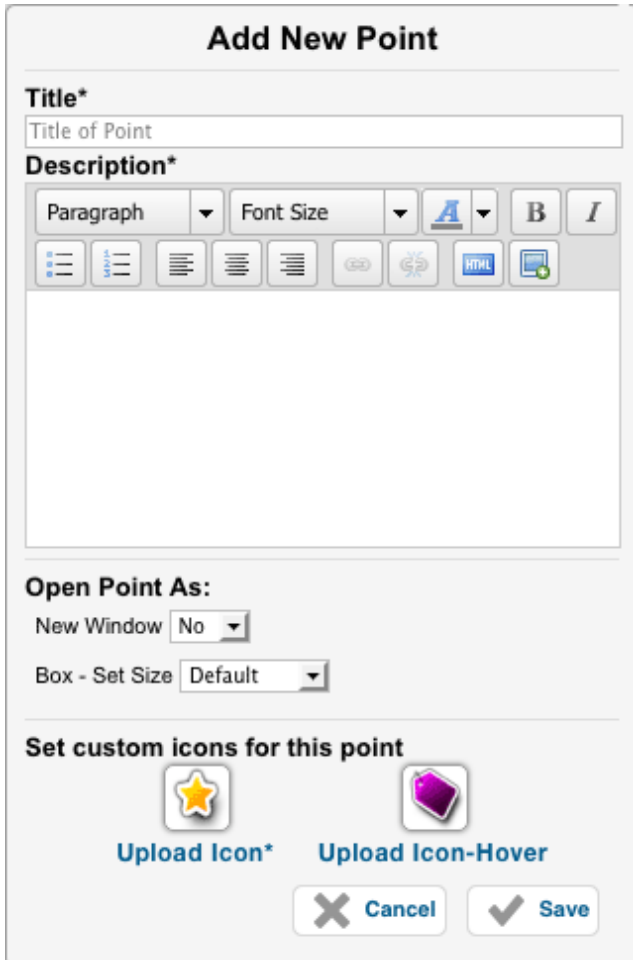

- **Icons –** Upload default icons for **POINTS**. Hover icons are optional.
- **Open Point Upon** – Hotspot point's trigger. Can be **CLICK** or **ROLL-OVER**
- **Select Color Scheme** – Preset color styles for AtomicOnline properties
- **Border Color** – Border color of tooltip
- **Background Color** – Background color of tooltip
- **Title Color** – Color of tooltip's title
- **Text Color** – Color of tooltip's content
- **Link Color** – Color of tooltip's links

Add New Point
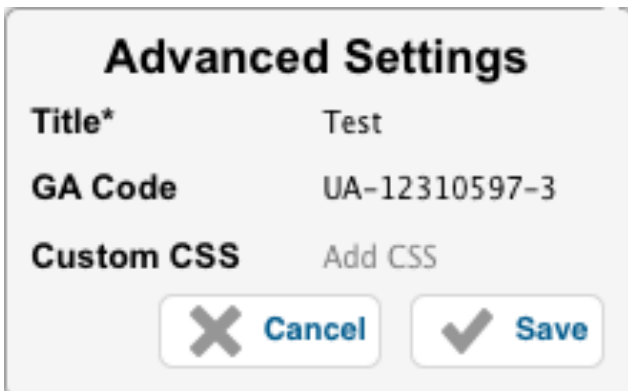

- **Title** – Tooltip's title
- **Description** – Tooltip's content. Can contain any combination of text, images and videos
- **New Window** – Point will open first link in **DESCRIPTION** upon trigger
- **Box – Set Size** – Sets the tooltip's size
  - **Default –** 50% of the dimensions of the background image
  - **2x Default** – Full dimensions of the background image
  - **Custom** – Specify a custom width and height for the tooltip
- **Icons –** Override the **DEFAULT STYLES** with specific icons

Advanced Settings

- **Title –** Hotspot's title
- **GA Code –** Edit the Google Analytics ID
- **Custom CSS** - Customize the Hotspot with individual custom CSS here

To edit a **POINT**, click/hover over the **POINT** to activate the **TOOLTIP**.
- Click the **TRASH BIN** button on the top left to delete the point
- Click the **PENCIL** button on the top right to edit the content (shown below)
